

Blue Heron Academy  
of Healing Arts & Sciences

Paramedical Skin Care  
Dermatology Medical Assistant

The Blue Heron Academy of Healing Arts and Sciences was the first state licensed post-secondary school in Michigan to develop a paramedical skin care program.

There is a growing need for paramedical skin care specialists who are skilled in medical spa services and clinical procedures specific to a medical skin care clinic. This program also involves the review of medical skin care consultation and dermatological assistant procedures. In the private practice sector, the paramedical skin care professional may be able to practice techniques used in anti-aging medicine and work with other qualified medical professionals and physicians.

Blue Heron Academy graduates of the paramedical skin care program have been well received by the medical community, specifically in medical spas, cosmetic surgery, and dermatology clinics and facilities.

The Blue Heron Academy teaches in compliance with Michigan regulations and we prepare our graduates for a rewarding career within the allied health care profession as paramedical skin care specialists.

### **Program Content:**

Microdermabrasion  
Chemical Peels  
Skin Rejuvenation  
Skin Evaluation and Assessment  
Product Analysis and Patient Education  
Plus Many Others

### **Certification upon completion:**

Medical Spa Technician  
Paramedical Skin Care Specialist  
Dermatology Medical Assistant

This program combines training in paramedical skin care with knowledge of the structure and function of the skin and integumentary system, skin disorders, medical skin care procedures, therapeutic modalities, hygiene and infection control, business, ethics, jurisprudence, and professional practices used in medical spas, cosmetic surgery, skin rejuvenation, and dermatology.

This program will prepare the student to enter the medical skin care and medical spa industry. Techniques will include paramedical skin care, skin rejuvenation, and microdermabrasion.
